

**KEYU INTELLIGENCE CO., LTD.** is located at Jiangmen City, Guangdong Pearl River Delta. In China, the first intelligent card lock was born here. The company began to design and manufacture the intelligent lock in 1993, and practiced the products of magcard lock in the same year, IC card lock in 1995, RF card lock in 2000. electronic cabinet lock in 2003, fingerprint lock in 2006. The company owns a professional procession to develop all of the intelligent products independently, with the consummate producing equipments and workshop matching with the after-sales service troops. It has more than 30 branch companies offices and technical service centers, more than 200 sales office in the main cities of China. And has established several services sites in Korea, United States, Singapore, Denmark, Spain, Thailand, Cambodia, Argentina and Hong Kong etc., to provide high-quality and convenient services for thousands of users.

For many years, we have been concentrating on designing and manufacturing hotel intelligent products and electrical appliances, and succeeded in magcard lock, IC card lock, TM card lock, RF card lock, intelligent safe, Energy-saving switch, micro-computer and mechanical control panel, and so on. "HUNE" is well-known brand of KEYU product.

Our company always insists on the principle of " High quality, credit standing is important ". In the violent marketing competition, the KEYU is constant from beginning to end, regarding quality as the forward, technique power as the backing, and wins the good opinion from domestic and abroad. KEYU personnel believe firmly that only the product brings mankind convenient is real technological product. KEYU will be your lifetime partner

### COMPONENTS OF LOCK SYSTEM

### Product feature

- Wireless system and stand-alone door lock:
- Lock hardware
- Mechanical key
- Keycards are limited by lock's clock
- Keycards are grouped into several levels
- Report the loss of keycard
- Avoid waiter's incautious disturb
- The lock memorizes the latest more than 200 access records
- Superb reliability and Low running cost

## HUNE Product type

### RF Card lock Type

Pearl gold  
(928P-D)

Nickel-gold plated  
(968AK-D)

Satin brass  
(939BK-D)

Nickel plated(brass)  
(029SS-D)

Gold plated  
(998B-D)

Satin stainless steel  
(930SS-D)

### Features

**Wireless system and stand-alone door lock** : HUNE® intelligent lock 968S-D requires no wiring, adopts the RF card of USA TEMIC® company or RF card of PHILIPS® company to perform control function and unlocking function, is completely independent and stand-alone, is controlled by program resident in the lock and activated by cards which are coded by issuing computer. All of these make installation and maintenance becomes simple and easy.

Adopt TEMIC® contactless RF card or MIFARE ONE® contactless RF card as keycard to enhance the security, reliability and convenience. The high performance integrate circuit with self-check function, automatically redress information mistake, inductive window automatically identify RF card, and run with super low consumption, the static consumption is low to 12 uA.

### IC card lock Type

Nickel-gold plated  
(968S)

Nickel plated(brass)  
(029SS)

Satin stainless steel  
(998S)

Nickel plated  
(998S)

Satin brass  
(028BK)

### Features

**Wireless system and stand-alone door lock** : HUNE® intelligent lock 028BK requires no wiring, adopts SIEMENS® IC card to perform control function and unlocking function, is completely independent and stand-alone, is controlled by program resident in the lock and activated by cards which are coded by issuing computer. All of these make installation and maintenance becomes simple and easy.

Adopt SIEMENS® encrypted IC card as keycard to enhance the security and reliability. Three times of wrong decryption will lead to ultimate destruction of the card, and thus makes counterfeiting impossible.

## TM/IB Card lock type

Gold plated  
(998B-T)

Nickel-gold plated  
(998AK-T)

Satin stainless steel  
(930S-T)

Satin brass  
(930BK-T)

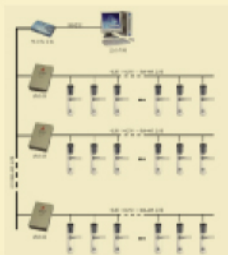

Once you choose HUNE® intelligent locks, means you have chosen the high quality to secure your valuable property and guests. The HUNE® locks offer you maximum safety and convenience, and help you to lower the operation costs.

### Features

**Wireless system and stand-alone door lock:** HUNE® intelligent lock 930S-T requires no wiring, adopts DALLAS® TM(IB) card to perform control function and unlocking function, is completely independent and stand-alone, is controlled by program resident in the lock and activated by cards which are coded by issuing computer. All of these make installation and maintenance becomes simple and easy.

**Adopt DALLAS® encrypted TM(IB) card as keycard** to enhance the security and reliability. The card is sealed in firm stainless steel structure with the function of water-proof, pressing-proof, destroy-proof, so it's durable

## Net lock type

## Home & Office lock type

RF card lock

Keypad Lock

IC card

## Cabinet lock type

RF card lock

TM card lock

## Energy Saving switch

When entering the rooms, the guests have to insert the room card into the Energy Saving Switch to turn on the illumination system. While leaving the room, the guest draw the room card; then the power supply will be shut off by the Energy Saving Switch about 15 seconds later. The delay function is very important in the Energy Saving Switch, without it, the guests have to leave the room in the dark. The consumption of the illumination system in each room in the hotel is about 2000 watt. If the guests forget to turn off all the electric appliances when they leave the room, which will be a great waste and it's very insecure. While their leaving, it is difficult for the waiter to know whether the lamps are turned on or not in the rooms. So we specially developed the Energy Saving Switch for the hotel to save the substantive regrettable consumption

## Software feature

Keycards are grouped into several levels to make the access authority clear. There are Master Card, Building Card, Floor Card, Waiter Card, and Guest Card. Hotel managers can modify the authority of each card according to actual need at any moment.

**Master Card:** can unlock all of the locks belong to the system without time's limited, even the deadbolt locks.

**Building Card:** Can unlock the locks belong to corresponding building; cannot unlock the deadbolted locks, with time's limited.

**Floor Card:** Can unlock the locks belong to corresponding floor; cannot unlock the deadbolted locks, with time's limited.

**Waiter Card:** Can unlock the locks belong to corresponding floor in specifying timeslice; cannot unlock the deadbolted locks, with time's limited.

**Guest Card:** For the guest to open the room he/she lodges in within the specifying period of time
